Journal of Ethnopharmacology 58 (1997) 229–232

Journal of ETHNO-PHARMACOLOGY

Subject index

Volume 58 (1997)

ACE; Traditional medicine; Diuretic; Antihypertensive; Angiotensin converting enzyme inhibitors; Ethnobotany; Réunion; Mascarenes **58**, 189

Acute toxicity; *Laurus nobilis*; Gastroprotective effect; Ethanol induced ulcer **58**, 9

Adjuvant arthritis; Lysosomal stability; *Semecarpus anacardium*; Glycoproteins **58**, 1

Aeollanthus suaveolens; Anticonvulsants; γ-decanolactone; Lactones **58**, 175

Aflatoxin B_1; Piperine; Protection; Cytotoxicity; Micronucleus formation; V79 constructs; V79MZr2B1; Cytochrome P4502B1 **58**, 165

Alloxan-diabetic rats; *Trigonella foenum-graecum* leaf; Hypoglycemic activity; Blood glucose **58**, 149

Anaemia; Iron content; Atomic absorption spectrophotometry; Medicinal plants; East Africa **58**, 97

Andrographis paniculata; Subchronic toxicity; Testicles; Leydig cells **58**, 219

Angiotensin converting enzyme inhibitors; Traditional medicine; Diuretic; Antihypertensive; ACE; Ethnobotany; Réunion; Mascarenes **58**, 189

Antibacterial; Antifungal; Ethnopharmacology; Indian medicinal plants **58**, 75

Antibody; *Tinospora cordifolia*; Anticomplementary; Immuno-modulation; Macrophage **58**, 89

Anticomplementary; *Tinospora cordifolia*; Immuno-modulation; Antibody; Macrophage **58**, 89

Anticonvulsants; *Aeollanthus suaveolens*; γ-decanolactone; Lactones **58**, 175

Antidiabetic activity; *Nelumbo nucifera*; Rhizome **58**, 207

Antifungal; Antibacterial; Ethnopharmacology; Indian medicinal plants **58**, 75

Antihyperglycaemic effect; *Caesalpinia bonducella* seeds; Aqueous extract; Ethanolic extract; Hypoglycaemic effect; Hypolipidemic effect; Streptozotocin diabetic rats **58**, 39

Antihypertensive activity; Tetrandrine; Fangchinoline; Vasodilation; Calcium channel blockers; Stroke-prone spontaneously hypertensive rats (SHRSP) **58**, 117

Antihypertensive; Traditional medicine; Diuretic; Angiotensin converting enzyme inhibitors; ACE; Ethnobotany; Réunion; Mascarenes **58**, 189

Antimicrobial activity; *Micromeria nervosa*; Carvacrol; Thymol; Susceptibility **58**, 143

Antimicrobial activity; *Pseudognaphalium*; Resinous exudate; Flavonoids; Diterpenoids **58**, 85

Antinociception; *Trigonella foenum-graecum*; Fenugrek; Medicinal plants; Formalin test; Tail-flick; Rat **58**, 125

Antioxidant activity; *Baccharis coridifolia*; Cytotoxic activity **58**, 157

Aqueous extract; *Caesalpinia bonducella* seeds; Ethanolic extract; Hypoglycaemic effect; Antihyperglycaemic effect; Hypolipidemic effect; Streptozotocin diabetic rats **58**, 39

Aquilaria agallocha; Thymelaeaceae; Immediate hypersensitivity; Mast cells; cAMP **58**, 31

Aromatherapy; Essential oils; Neuromuscular transmission; Skeletal muscle; Smooth muscle **58**, 183

Atomic absorption spectrophotometry; Iron content; Medicinal plants; Anaemia; East Africa **58**, 97

0378-8741/97/$17.00 © 1997 Elsevier Science Ireland Ltd. All rights reserved.

PII S0378-8741(97)00120-7

Baccharis coridifolia; Antioxidant activity; Cytotoxic activity **58**, 157

Bioactivities; *Cassia italica*; Ethnopharmacological evaluation **58**, 135

Blood glucose; *Trigonella foenum-graecum* leaf; Hypoglycemic activity; Alloxan-diabetic rats **58**, 149

Buddleja madagascariensis; Mimengoside B; Therapeutic properties **58**, 215

***Caesalpinia bonducella* seeds**; Aqueous extract; Ethanolic extract; Hypoglycaemic effect; Antihyperglycaemic effect; Hypolipidemic effect; Streptozotocin diabetic rats **58**, 39

Calcium channel blockers; Tetrandrine; Fangchinoline; Vasodilation; Antihypertensive activity; Stroke-prone spontaneously hypertensive rats (SHRSP) **58**, 117

cAMP; *Aquilaria agallocha*; Thymelaeaceae; Immediate hypersensitivity; Mast cells **58**, 31

Carcinogen (ochratoxin A); Indian herbs; Macrophage; Cytokine production **58**, 15

Carvacrol; *Micromeria nervosa*; Thymol; Antimicrobial activity; Susceptibility **58**, 143

Cassia italica; Ethnopharmacological evaluation; Bioactivities **58**, 135

CCl_4; Flyash; Cellular toxicity; Lung; Koflet **58**, 109

Cellular toxicity; Flyash; CCl_4; Lung; Koflet **58**, 109

Croton lechleri; Free radicals; Luminol enhanced chemiluminescence; DNA damage **58**, 103

Cytochrome P4502B1; Piperine; Protection; Aflatoxin B_1; Cytotoxicity; Micronucleus formation; V79 constructs; V79MZr2B1 **58**, 165

Cytokine production; Indian herbs; Carcinogen (ochratoxin A); Macrophage **58**, 15

Cytotoxic activity; *Baccharis coridifolia*; Antioxidant activity **58**, 157

Cytotoxicity; Piperine; Protection; Aflatoxin B_1; Micronucleus formation; V79 constructs; V79MZr2B1; Cytochrome P4502B1 **58**, 165

γ-Decanolactone; *Aeollanthus suaveolens*; Anticonvulsants; Lactones **58**, 175

Diabetes; Phytotherapy; Hypertension; Oriental Morocco; Survey **58**, 45

Diterpenoids; *Pseudognaphalium*; Resinous exudate; Flavonoids; Antimicrobial activity **58**, 85

Diuretic; Traditional medicine; Antihypertensive; Angiotensin converting enzyme inhibitors; ACE; Ethnobotany; Réunion; Mascarenes **58**, 189

DNA damage; *Croton lechleri*; Free radicals; Luminol enhanced chemiluminescence **58**, 103

Drug metabolizing enzymes; Horminone; Liver **58**, 21

East Africa; Iron content; Atomic absorption spectrophotometry; Medicinal plants; Anaemia **58**, 97

Essential oils; Neuromuscular transmission; Skeletal muscle; Smooth muscle; Aromatherapy **58**, 183

Ethanolic extract; *Caesalpinia bonducella* seeds; Aqueous extract; Hypoglycaemic effect; Antihyperglycaemic effect; Hypolipidemic effect; Streptozotocin diabetic rats **58**, 39

Ethanol induced ulcer; *Laurus nobilis*; Gastroprotective effect; Acute toxicity **58**, 9

Ethnobotany; Traditional medicine; Diuretic; Antihypertensive; Angiotensin converting enzyme inhibitors; ACE; Réunion; Mascarenes **58**, 189

Ethnopharmacological evaluation; *Cassia italica*; Bioactivities **58**, 135

Ethnopharmacology; Antibacterial; Antifungal; Indian medicinal plants **58**, 75

Fangchinoline; Tetrandrine; Vasodilation; Calcium channel blockers; Antihypertensive activity; Stroke-prone spontaneously hypertensive rats (SHRSP) **58**, 117

Fenugrek; *Trigonella foenum-graecum*; Medicinal plants; Antinociception; Formalin test; Tail-flick; Rat **58**, 125

Flavonoids; *Pseudognaphalium*; Resinous exudate; Diterpenoids; Antimicrobial activity **58**, 85

Flyash; CCl_4; Cellular toxicity; Lung; Koflet **58**, 109

Formalin test; *Trigonella foenum-graecum*; Fenugrek; Medicinal plants; Antinociception; Tail-flick; Rat **58**, 125

Free radicals; *Croton lechleri*; Luminol enhanced chemiluminescence; DNA damage **58**, 103

Gastroprotective effect; *Laurus nobilis*; Acute toxicity; Ethanol induced ulcer **58**, 9

γ-Globulin; *Panax ginseng*; Immunoglobulin isotype **58**, 55

Glycoproteins; Adjuvant arthritis; Lysosomal stability; *Semecarpus anacardium* **58**, 1

Horminone; Drug metabolizing enzymes; Liver **58**, 21

Hypertension; Phytotherapy; Diabetes; Oriental Morocco; Survey **58**, 45

Hypoglycaemic effect; *Caesalpinia bonducella* seeds; Aqueous extract; Ethanolic extract; Antihyperglycaemic effect; Hypolipidemic effect; Streptozotocin diabetic rats **58**, 39

Hypoglycemic activity; *Trigonella foenum-graecum* leaf; Alloxan-diabetic rats; Blood glucose **58**, 149

Hypolipidemic effect; *Caesalpinia bonducella* seeds; Aqueous extract; Ethanolic extract; Hypoglycaemic effect; Antihyperglycaemic effect; Streptozotocin diabetic rats **58**, 39

Immediate hypersensitivity; *Aquilaria agallocha*; Thymelaeaceae; Mast cells; cAMP **58**, 31

Immunoglobulin isotype; *Panax ginseng*; γ-Globulin **58**, 55

Immuno-modulation; *Tinospora cordifolia*; Anticomplementary; Antibody; Macrophage **58**, 89

Indian herbs; Carcinogen (ochratoxin A); Macrophage; Cytokine production **58**, 15

Indian medicinal plants; Antibacterial; Antifungal; Ethnopharmacology **58**, 75

Interleukin-1 inhibition; Turkish folk medicine; Tumor necrosis factor inhibition **58**, 59

Iron content; Atomic absorption spectrophotometry; Medicinal plants; Anaemia; East Africa **58**, 97

Koflet; Flyash; CCl_4; Cellular toxicity; Lung **58**, 109

Lactones; *Aeollanthus suaveolens*; Anticonvulsants; γ-decanolactone **58**, 175

Laurus nobilis; Gastroprotective effect; Acute toxicity; Ethanol induced ulcer **58**, 9

Leydig cells; *Andrographis paniculata*; Subchronic toxicity; Testicles **58**, 219

Liver; Horminone; Drug metabolizing enzymes **58**, 21

Luminol enhanced chemiluminescence; *Croton lechleri*; Free radicals; DNA damage **58**, 103

Lung; Flyash; CCl_4; Cellular toxicity; Koflet **58**, 109

Lysosomal stability; Adjuvant arthritis; *Semecarpus anacardium*; Glycoproteins **58**, 1

Macrophage; Indian herbs; Carcinogen (ochratoxin A); Cytokine production **58**, 15

Macrophage; *Tinospora cordifolia*; Anticomplementary; Immuno-modulation; Antibody **58**, 89

Mascarenes; Traditional medicine; Diuretic; Antihypertensive; Angiotensin converting enzyme inhibitors; ACE; Ethnobotany; Réunion **58**, 189

Mast cells; *Aquilaria agallocha*; Thymelaeaceae; Immediate hypersensitivity; cAMP **58**, 31

Medicinal plants; Iron content; Atomic absorption spectrophotometry; Anaemia; East Africa **58**, 97

Medicinal plants; *Trigonella foenum-graecum*; Fenugrek; Antinociception; Formalin test; Tail-flick; Rat **58**, 125

Micromeria nervosa; Carvacrol; Thymol; Antimicrobial activity; Susceptibility **58**, 143

Micronucleus formation; Piperine; Protection; Aflatoxin B_1; Cytotoxicity; V79 constructs; V79MZr2B1; Cytochrome P4502B1 **58**, 165

Mimengoside B; *Buddleja madagascariensis*; Therapeutic properties **58**, 215

Nelumbo nucifera; Rhizome; Antidiabetic activity **58**, 207

Neuromuscular transmission; Essential oils; Skeletal muscle; Smooth muscle; Aromatherapy **58**, 183

Oriental Morocco; Phytotherapy; Hypertension; Diabetes; Survey **58**, 45

Panax ginseng; γ-Globulin; Immunoglobulin isotype **58**, 55

Phytotherapy; Hypertension; Diabetes; Oriental Morocco; Survey **58**, 45

Piperine; Protection; Aflatoxin B_1; Cytotoxicity; Micronucleus formation; V79 constructs; V79MZr2B1; Cytochrome P4502B1 **58**, 165

Protection; Piperine; Aflatoxin B_1; Cytotoxicity; Micronucleus formation; V79 constructs; V79MZr2B1; Cytochrome P4502B1 **58**, 165

Pseudognaphalium; Resinous exudate; Flavonoids; Diterpenoids; Antimicrobial activity **58**, 85

Rat; *Trigonella foenum-graecum*; Fenugrek; Medicinal plants; Antinociception; Formalin test; Tail-flick **58**, 125

Resinous exudate; *Pseudognaphalium*; Flavonoids; Diterpenoids; Antimicrobial activity **58**, 85

Réunion; Traditional medicine; Diuretic; Antihypertensive; Angiotensin converting enzyme inhibitors; ACE; Ethnobotany; Mascarenes **58**, 189

Rhizome; *Nelumbo nucifera*; Antidiabetic activity **58**, 207

Semecarpus anacardium; Adjuvant arthritis; Lysosomal stability; Glycoproteins **58**, 1

Skeletal muscle; Essential oils; Neuromuscular transmission; Smooth muscle; Aromatherapy **58**, 183

Smooth muscle; Essential oils; Neuromuscular transmission; Skeletal muscle; Aromatherapy **58**, 183

Streptozotocin diabetic rats; *Caesalpinia bonducella* seeds; Aqueous extract; Ethanolic extract; Hypoglycaemic effect; Antihyperglycaemic effect; Hypolipidemic effect **58**, 39

Stroke-prone spontaneously hypertensive rats (SHRSP); Tetrandrine; Fangchinoline; Vasodilation; Calcium channel blockers; Antihypertensive activity **58**, 117

Subchronic toxicity; *Andrographis paniculata*; Testicles; Leydig cells **58**, 219

Survey; Phytotherapy; Hypertension; Diabetes; Oriental Morocco **58**, 45

Susceptibility; *Micromeria nervosa*; Carvacrol; Thymol; Antimicrobial activity **58**, 143

Tail-flick; *Trigonella foenum-graecum*; Fenugrek; Medicinal plants; Antinociception; Formalin test; Rat **58**, 125

Testicles; *Andrographis paniculata*; Subchronic toxicity; Leydig cells **58**, 219

Tetrandrine; Fangchinoline; Vasodilation; Calcium channel blockers; Antihypertensive activity; Stroke-prone spontaneously hypertensive rats (SHRSP) **58**, 117

Therapeutic properties; *Buddleja madagascariensis*; Mimengoside B **58**, 215

Thymelaeaceae; *Aquilaria agallocha*; Immediate hypersensitivity; Mast cells; cAMP **58**, 31

Thymol; *Micromeria nervosa*; Carvacrol; Antimicrobial activity; Susceptibility **58**, 143

Tinospora cordifolia; Anticomplementary; Immuno-modulation; Antibody; Macrophage **58**, 89

Traditional medicine; Diuretic; Antihypertensive; Angiotensin converting enzyme inhibitors; ACE; Ethnobotany; Réunion; Mascarenes **58**, 189

Trigonella foenum-graecum; Fenugrek; Medicinal plants; Antinociception; Formalin test; Tail-flick; Rat **58**, 125

***Trigonella foenum-graecum* leaf**; Hypoglycemic activity; Alloxan-diabetic rats; Blood glucose **58**, 149

Tumor necrosis factor inhibition; Turkish folk medicine; Interleukin-1 inhibition **58**, 59

Turkish folk medicine; Interleukin-1 inhibition; Tumor necrosis factor inhibition **58**, 59

Vasodilation; Tetrandrine; Fangchinoline; Calcium channel blockers; Antihypertensive activity; Stroke-prone spontaneously hypertensive rats (SHRSP) **58**, 117

V79 constructs; Piperine; Protection; Aflatoxin B_1; Cytotoxicity; Micronucleus formation; V79MZr2B1; Cytochrome P4502B1 **58**, 165

V79MZr2B1; Piperine; Protection; Aflatoxin B_1; Cytotoxicity; Micronucleus formation; V79 constructs; Cytochrome P4502B1 **58**, 165
